SECTION D			
D11C01	52.211-9008	BAR CODING (APPLICABLE TO DSCC, DSCP AND DSCR ONLY) (FEB 2004) DLAD	
(a) This bar coding requirement is applicable only to solicitations and awards issued by DSCC, DSCP, and DSCR that required shipments of material to a location other than a DLA Distribution Depot (i.e., direct vendor delivery (DVD)). This clause requires a linear bar code only. (b) In addition to other marking requirements in this contract, the following separate lines of bar coded data, with Human Readable Interpretation (HRI) printed directly below the element, shall be provided: (1) Document number and suffix. (2) National Stock Number (NSN) (in absence of the NSN, the CAGE and Part Number). (3) ICP Routing Identifier Code (RIC), Unit of Issue, quantity, followed by an 'A' and eight zeros. (c) These bar code markings shall either be placed on or printed on labels affixed to either the DD Form 250/250c or the commercial packing list. If used on DD Form 250/250c, it should be in blocks 15, 16,17, etc. In either case, these documents shall be furnished in Packing List Envelopes affixed to the outside of the shipping container. (d) The bar code symbology shall be Code 3 of 9 (Code 39) in accordance with ISO/IEC-16388. NOTES: In bar code element 1 above, the Document Number consists of a 14-character (15 characters when a suffix is included) alphanumeric code. It may be listed on a contract/award as the Requisition Number, Transportation Control Number (TCN), etc.			(a) MIL-STD-129, Revision P, dated December 15, 2002, establishes the requirement for Contractors that ship packaged materiel to the Government to provide both linear and two-dimensional (2-D) bar coding on military shipping labels (MSLs) (but see exceptions in paragraph (d)). The new requirements apply to all shipments, which includes either depot (DLA-Direct) or DVD (Customer-Direct) shipments. Linear (Code 3 of 9 or Code 39) bar codes continue to be required on interior packages (unit and intermediate packages) for the National Stock Number (NSN) and, when applicable, the serial number; and on shipping containers and palletized unit loads for the NSN, Contractor and Government Entity (CAGE) Code, contract number and, when applicable, the serial number. The new requirements do not apply to delivery orders when the basic contract has not been modified to require MIL-STD-129P. (b) The new MSL replaces former DD Form 1387 and is illustrated in Figures 2a and 2b of MIL-STD-129P. The MSL requires Code 3 of 9 or Code 39 linear bar codes for the Transportation Control Number (TCN), piece number and DoDAAC for the ultimate consignee or mark-for address. The 2-D bar code on the MSL must contain the document (requisition) number, NSN, Routing Identifier Code (RIC), Unit of Issue, Quantity, Condition Code, and Unit Price, which are ordinarily included on the DD Form 250 or the DD Form 1348-1A. MIL-STD-129P provides numerous illustrations of what must be bar-coded and the recommended placement of the bar code. When the contract omits any data element required to be bar-coded, the field should be zero-filled. (c) MIL-STD-129P, sources for conforming labels, and related information are available on the DLA Packaging Web Site at URL: http://www.dsccl.dla.mil/offices/packaging/specstdslist.html#STDs . (d) This clause does not apply to - (1) Subsistence items procured through full-line food distributors (prime vendors), 'market ready' type items such as fresh milk, ice cream, and other fresh dairy products, fresh bread and other fresh bakery products, and all fresh fruits and vegetables, shipped within the Continental United States (CONUS); (2) Any item for which ownership remains with the vendor until the item is placed in designated locations at the customer location prior to issuance to the customer. Government control begins upon placement of the item by the vendor into the designated location or issuance from the designated location by vendor personnel (i.e., the vendor is required to stock bins at the customer location and/or issue parts from a vendor controlled parts room); or (3) Bulk purchases of petroleum, oil and lubricant products delivered by (1) pipeline; or (2) tank car, tanker and tank trailer for which the container has (i) a capacity greater than 450 L (119 gallons) as a receptacle for a liquid; (ii)

NOTES: In bar code element 1 above, the Document Number consists of a 14-character (15 characters when a suffix is included) alphanumeric code. It may be listed on a contract/award as the Requisition Number, Transportation Control Number (TCN), etc.

In bar code element 2 above, the NSN will appear as a 13-digit code without the dashes.

In bar code element 3 above:

The RIC for each procuring activity is as follows:

S9E - Defense Supply Center Columbus - Electronics

S9G - Defense Supply Center Richmond

S9T - Defense Supply Center Philadelphia - Clothing and Textiles
